Paris, Aug. 23.—(By The A. P.)—The number of Russian Soviet prisoners captured in the Polish counter-offensive will amount to 75,000, according to Warsaw dispatches to the French foreign office today.

Most of the 35,000 prisoners already captured were captured in the territory southwest of Warsaw, including the Danzig corridor, by the army under command of the French general, who formerly was chief of staff to General Lyautey, resident French governor of Morocco. This army now is most effective and is composed of German-trained men of Poles.

Another Polish army under command of the French general, Henry, is striking toward Bialystok from Warsaw, cutting off the bolshevik retreat.

There are lots of things that a man would not want to do so much if he thought there was any chance of getting him.

If a man is just as good as another, he doesn't have to insist that he is.
